Subject: FW: Response Requested - PFAS Site Information for OMB
Date: Tuesday, September 14, 2021 2:12:35 PM

HQ asked for a quick turn-around, but it does not need to be exact.

I entered some info based upon various sourced (e.g., PFAS Fact Sheets etc,) but if you see something incorrect, please edit/add.

Thanks.

doug

Site Name	PFAS Release	# of Sites	Phase	RI Start		
AFWTF - Vieques	Unknown	14	SI	Unknown		
BNL	Yes	2	SI	4Q/FY22		
FAA	Yes		SI	Unknown		
Earle	Yes	8	SI			
Griffiss	Yes	17	SI

Subject: Response Requested - PFAS Site Information for OMB

Good Afternoon –

FFRRO is preparing for a program briefing with our OMB examiner scheduled for next week.

The OLEM OMB examiner has requested that FFRRO provide information on the pipeline status of PFAS activities such as the number of sites and where they are in the CERCLA pipeline.

Recently DoD has presented information suggesting that PFAS releases have been confirmed

or are suspected at over 90 of its Federal Facility NPL sites and has begun moving from pre-Remedial Investigation drinking water sampling to the RI/Feasibility Study phase at its NPL sites, with multiple RI starts during the 4th Quarter of FY 2020.

This is an opportunity for EPA to reinforce the collaboration with DoD to prioritize PFAS cleanups and the protection of human health where these releases are being evaluated. Please provide the names and of sites and number of operable units at those sites where PFAS are a concern, where they are in the pipeline and, if they are anticipated to move to the RI phase, when they are expected to begin the RI.

This is a quick turnaround request, but we are not asking for great detail. OMB is just looking for the numbers and an estimated timeline.

Please provide any information to Mary Cooke (cooke.maryt@epa.gov) by 21 September 2021.

Thank you for your help.
